*« A good Data Citizen is someone who knows how to **work with data** to **answer questions** in their day-to-day work »*

Camille V.

Head of Data & AI – Large company

Club Power BI – janvier 2023

"NOW, TALKING ABOUT TECHNOLOGY IS ONE THING, BUT IF YOU REALLY AS AN ORGANIZATION WANT TO CHANGE ANYTHING, IT'S ABOUT CULTURE. AND WHEN IT COMES TO DATA AND TO BE ABLE TO TRULY BENEFIT FROM THIS PLATFORM, YOU NEED TO HAVE A **DATA CULTURE** INSIDE OF YOUR ORGANIZATION."

SATYA NADELLA

2014

Key factors to Data Culture

Recognize the role of Data Citizens

Understanding their needs and responsibilities is the first step toward a truly data-driven organization.

Adopt a self-service platform and a decentralized approach

Combine the power of self-service tools with modern architectures like Data Mesh to scale analytics across domains.

Enhance the experience with low-code tools and AI assistance

Copilots and other AI-powered features simplify tasks, guide users, and make data work more accessible than ever.

Foster a culture of data empowerment

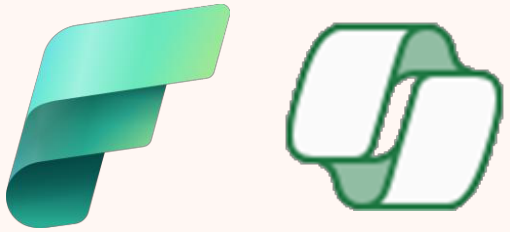

Microsoft Fabric encourages collaboration, trust, and innovation by putting data in the hands of those who need it most.

Empowering Data Citizens

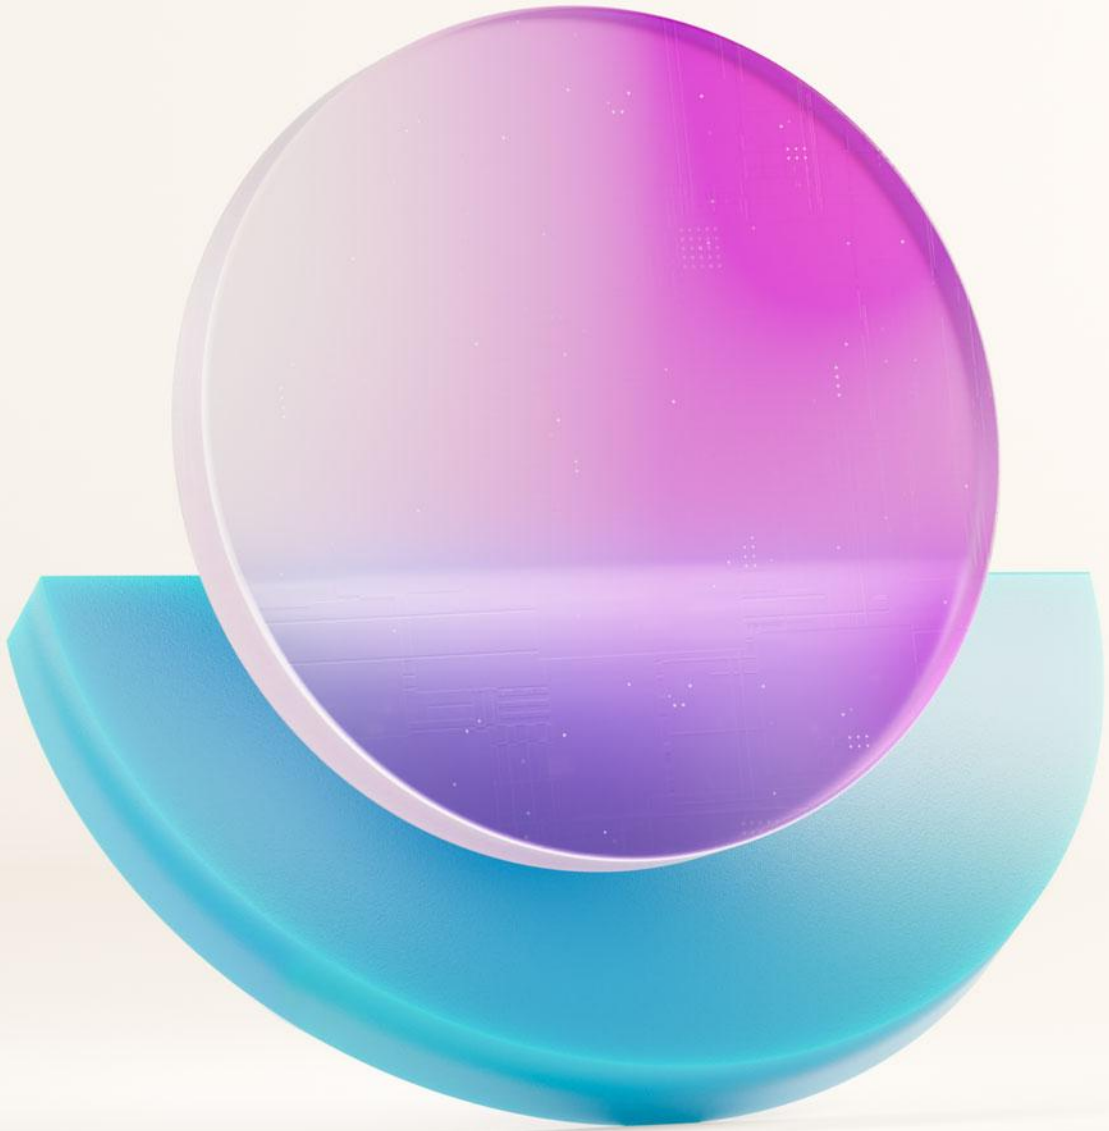

- **Tools : a Self-Serve Data Platform**
  - Self-Service BI allows users to access data independently.
  - Low Code / No Code facilitates easier data manipulation.
  - AI (with Copilot) enhances user productivity.

[Em]Power

- **Organizational Approach : Data Mesh**
  - Data Mesh Principles support decentralized data management

Tools

Challenges to tackle

🔍 Discover Data

Find the data you need easily

♻️ (Re)use Data

Don’t reinvent the wheel, reuse trusted data

📣 Promote Data

Share and showcase valuable assets

🛡️ Govern Data

Apply rules and make data safe & compliant

🔓 Access Data

🛠️ Work with Data

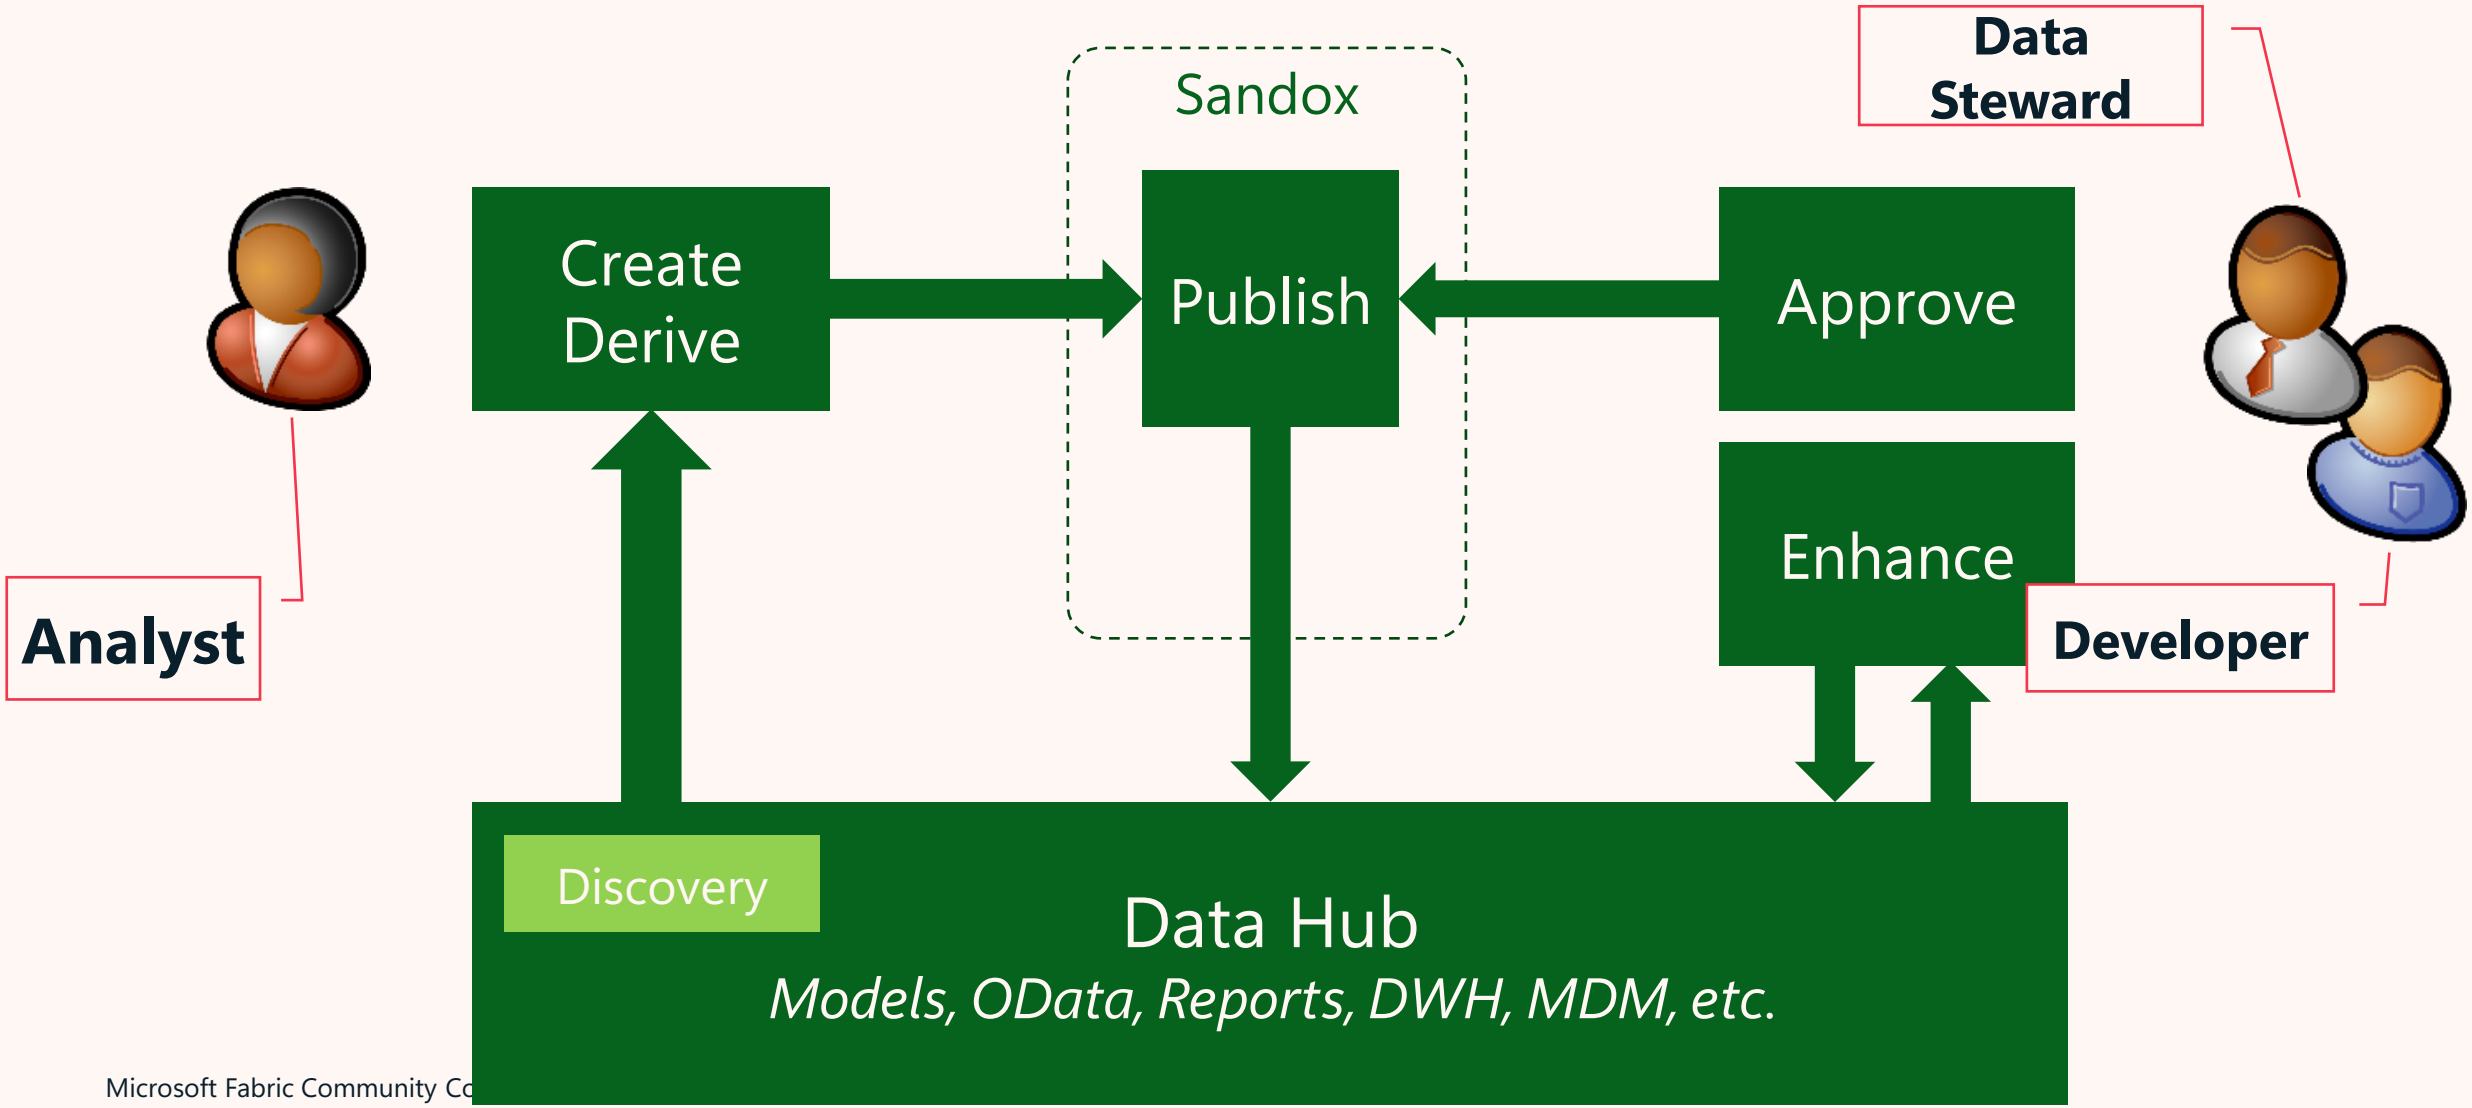

🤝 Collaborate

✅ Trust in Data

What I presented to clients in 2013

Fabric in Action

demo

Topic	Solution in Fabric to consider
🔍 **Discover Data**	OneLake Catalog, Purview
📣 **Promote Data**	Endorsment
🛡️ **Govern Data**	Purview, API, Ownership
✅ **Trust in Data**	Endorsment, Data Quality, Security (RLS, OLS, etc.)
🔓 **Access Data**	Purview, Sharing, Security
♻️ **Explore Data**	Copilot, AI Skills
🛠️ **Work with Data**	Self-Serve Anlaytics : Dataflow Gen2, Power BI but also Notebooks, SQL, Real-Time, AI
🤝 **Collaborate**	Sharing

OneLake catalog

Domain: Sales

Explore Govern

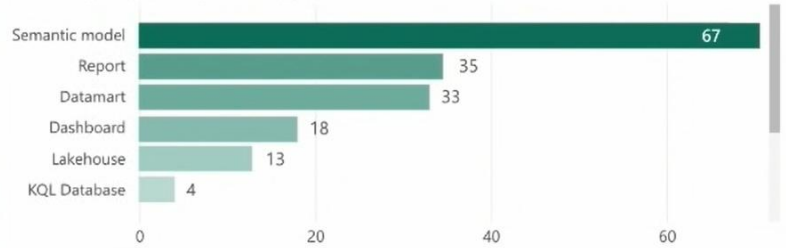

Your governance status at a glance

Data last refreshed: 9:30 AM, 9/25/24.

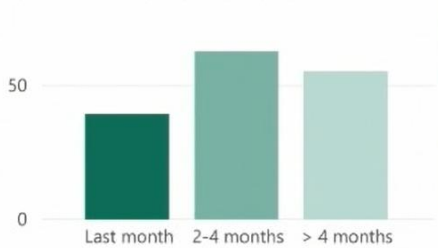

Refresh View more

Domains 1
Workspaces 21
Items 175

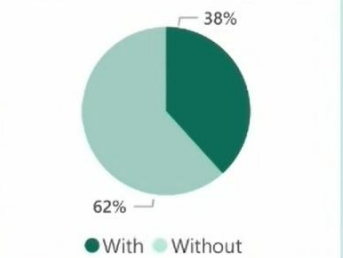

Items you own by item type

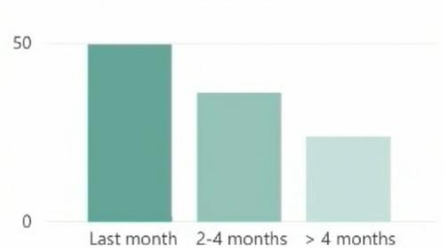

Your items by last refresh date

Your items with descriptions

Your items by last access date

Recommended actions

- Increase sensitivity label coverage
- Refresh outdated data items
- Assign all your workspaces to domains
- Apply relevant tags to your items
- Increase the percentage of endorsed items

Top solutions

Monitor
View and track the status of activities across all the Fabric workspaces you can access.
Open
Use Monitor—Microsoft Learn

Data lineage and impact analysis
View lineage relationships between content items and see how changes impact downstream, before you make them.
Lineage in Fabric—Microsoft Learn
Impact analysis—Microsoft Learn

Endorsement
Encourage data discovery and reuse by endorsing quality content as Promoted, Certified, or Master data.
Endorsement—Microsoft Learn

Tags (preview)
Apply relevant tags to your items so they're easier to discov manage.
Tags (preview)—Microsoft Learn

OneLake catalog

Generally Available

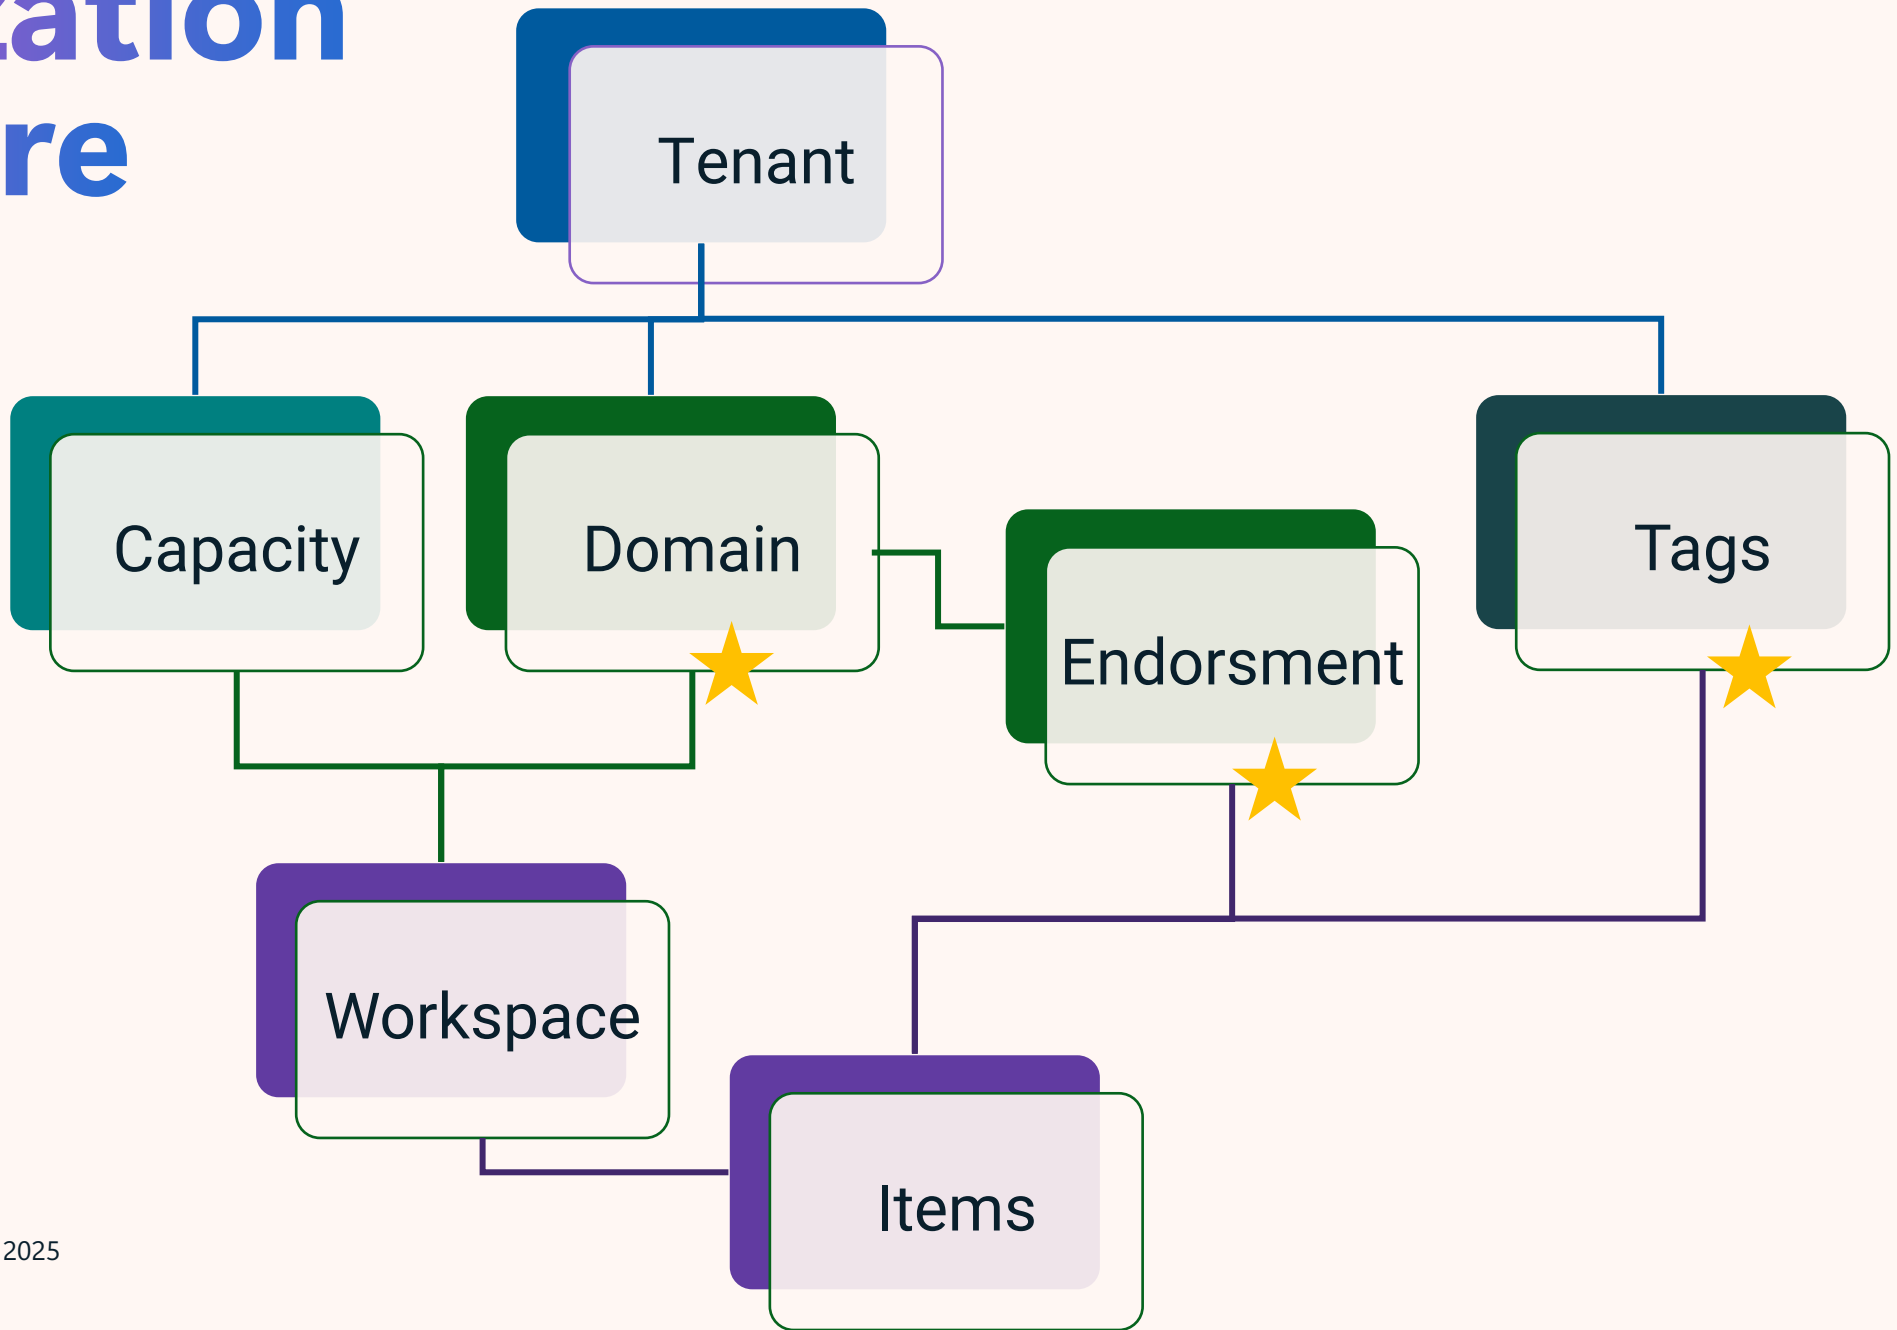

Unified view of org data estate to boost discovery & collaboration on data, processes, insights, and AI

Easily explore & manage your data in place including item details, lineage, refreshes, and more

Effectively govern your data at scale with insights, recommended actions, and tooling (review)

Integrated directly into Microsoft365, Microsoft Copilot Studio, and Azure portal experiences

Organization Structure

Implicit metadata

Purview

- Risk & Compliance focused
  - Data Governance comes after
- Security oriented (eg. DLP)
- Structure your **Enterprise** Data Governance
  - Domains & Data Products approach
  - Multi Data Sources
  - ➡️ not for local and operational Data Governance (Catalog, Data Quality, Lineage)

Microsoft Fabric

The data platform for the era of AI

Copilot accelerated experiences

Stay focused on unlocking value from your data with Copilots accelerating every experience

Generative AI on Your Data

Create AI plug-ins to deliver custom AI experiences for your data

AI Driven Insights

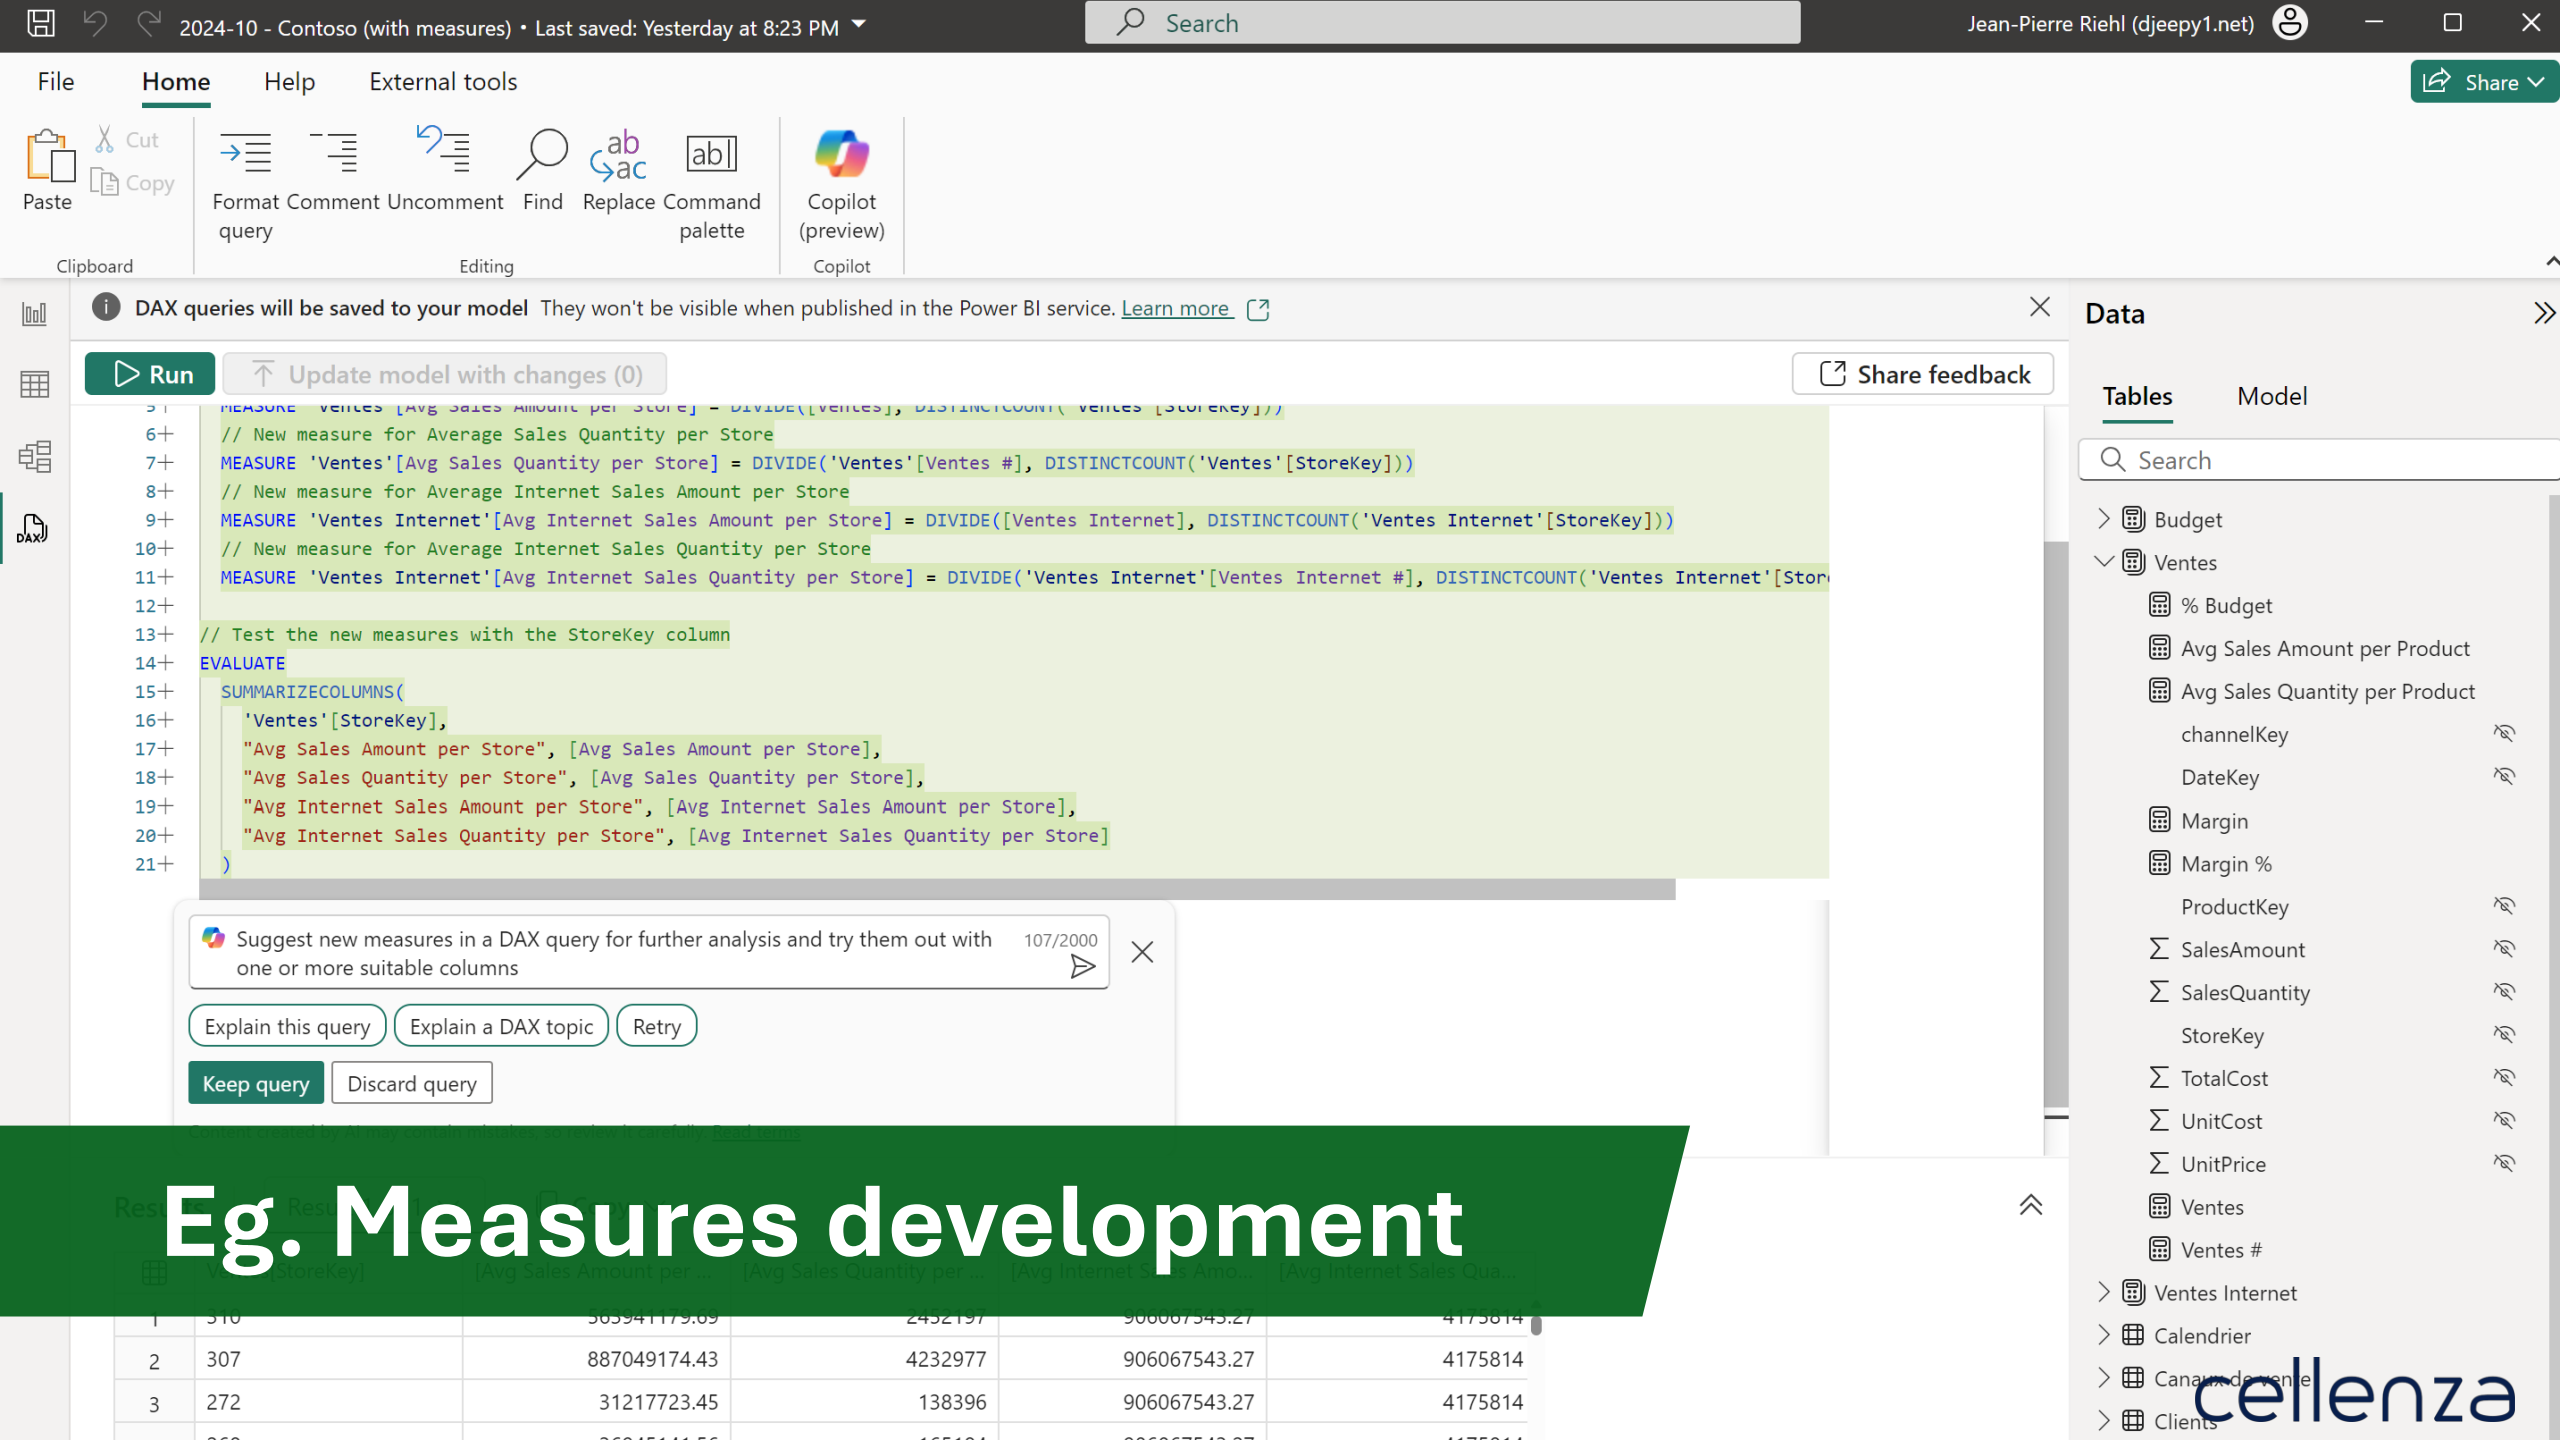

Unlock deeper insights and drive action faster with best-in-class AI models

General Availability

Copilot in Fabric

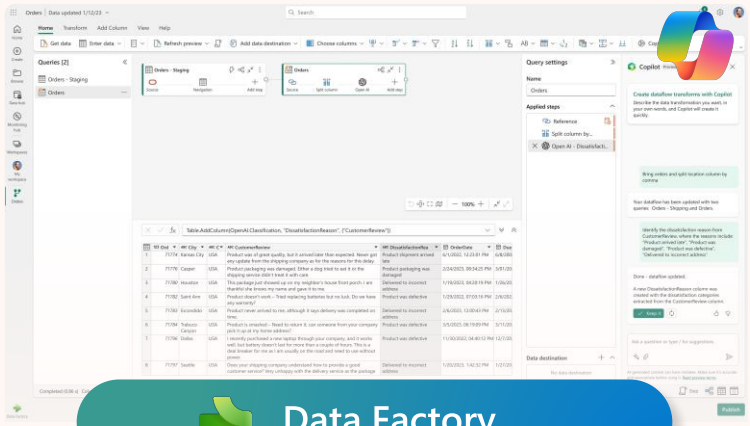

AI Powered

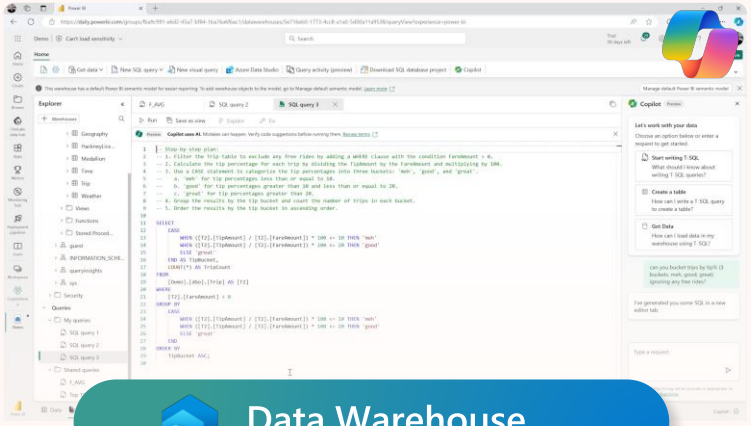

Eg. Measures development

cellenza

Wrap-Up & Takeaways

Tips & tricks

- 📣 **Promote &** 🔍 **Discover**
  - 💡 Describe your Fabric Items – naming is important
  - 📣 Endorse items
  - 💡 Use Domains to organize assets in the Enterprise Data Estate
  - 💡 Use Tags for alternate categorization
- 🛡️ **Govern &** 🔓 **Access**
  - ⚖️ Find the right granularity for security.
    My advice : Workspace Level for item + RLS for Data
  - 💡 Use Request Access Forms (eg. Purview)
- ♻️ **Reuse & Work** 🛠️
  - 💡 Build permission + Composite Models
  - 💡 Low-Code experience
  - 💡 AI experience

Conclusion & Takeaway

🚀 **Fabric empowers everyone**

From analysts to business users, anyone can build, explore, and share trusted data.

🧰 **Low-Code + AI + Governance = Speed & Safety**

With tools like Copilot, OneLake, and Purview, users work faster *and* safer.

🌐 **From Self-Service BI to Data Mesh**

Empower local teams without losing control—data is a shared responsibility.

🤝 **Collaboration is key**

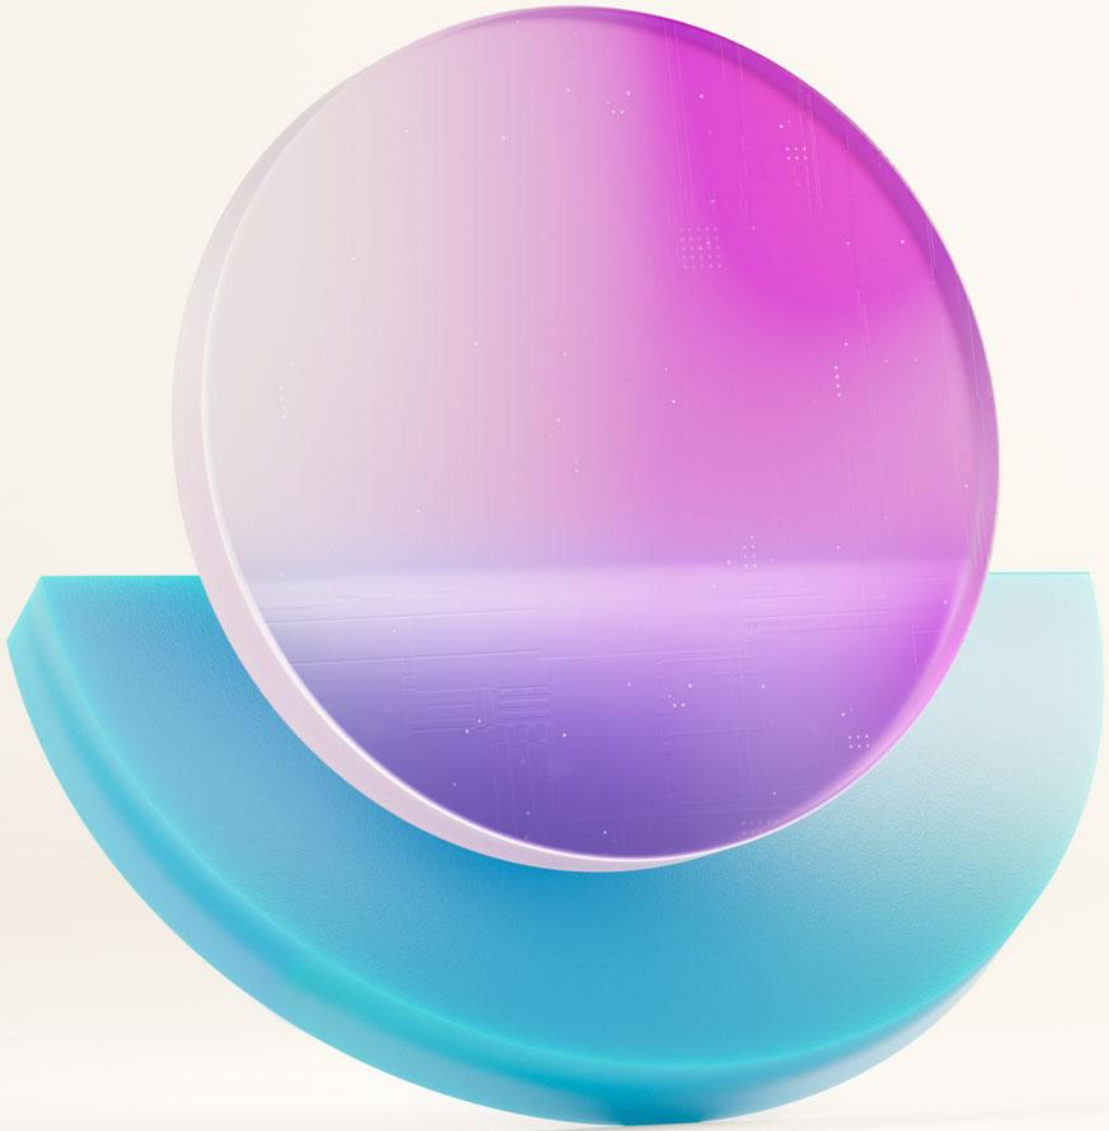

Promote, reuse, and govern data together. Shared assets = shared success.

🔮 **Your next step?**

Be a good Data Citizen: discover, share, and build trust in your data ecosystem.
